

# Z-GROUP architects

Z-Group (CGA) Architects has extensive experience with Library projects, having worked on over 40 Libraries in Colorado and Internationally. We understand that these Libraries must fit the local characteristics and represent a source of “Pride and Vision” for each community. Our staff envisions these facilities to be not used simply as Libraries, but as Community Centers where the population returns to again and again. This is accomplished by “Future-Proofing” buildings by way of timeless, “Energy Positive” design and technologies which allow for flexibility to meet the demands of the communities as they grow and change.
