

# Z-GROUP architects

Our firm has specialized in public work and has provided Planning, Architectural and Design services for over 200 Educational projects throughout the Rocky Mountain Region. We understand how to arrange spaces to respond to the dictates of function as well as remain efficient and flexible for future growth and change. Z-Group (CGA) Architects believes there is no more exciting type of architectural design work than to plan and design Educational Facilities that will be a center of activity and learning as well as a place where community members can participate in meetings and enjoy performances.

To paraphrase Winston Churchill, "We shape our buildings, and thereafter they shape us."
